

## New Home Screen

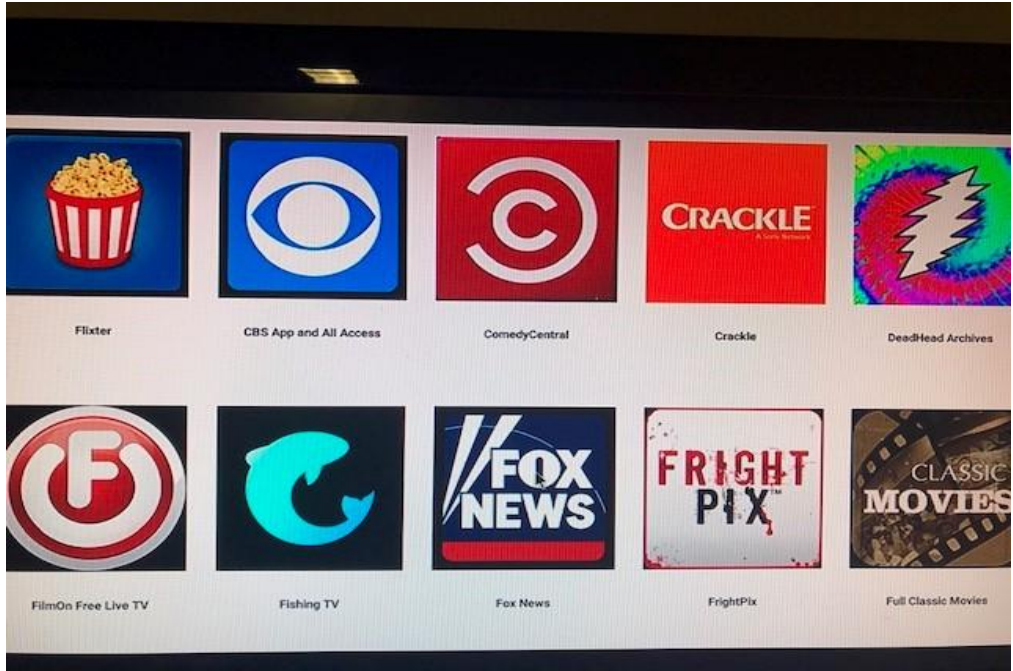

## Select Steaming Channels

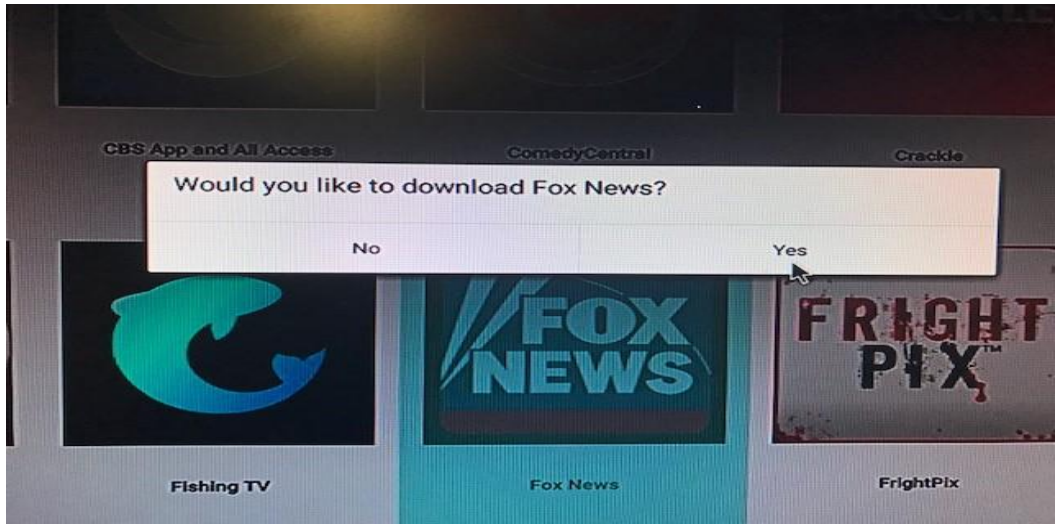

There are three ways of adding streaming channels and addons to your tickbox

### 1. Select Streaming Channels

Click on any of the preselected Android Apps on Tickbox

General disclaimer: By downloading or using you are agreeing that the author takes no responsibility for the content or reliability of any of the addons included. The author does not host, distribute or have any control over any of the content that may be provided by any addon. It is the users responsibility to ensure the legality of use within their country.

Do you want to install this application? It does not require any special access.

CANCEL

INSTALL

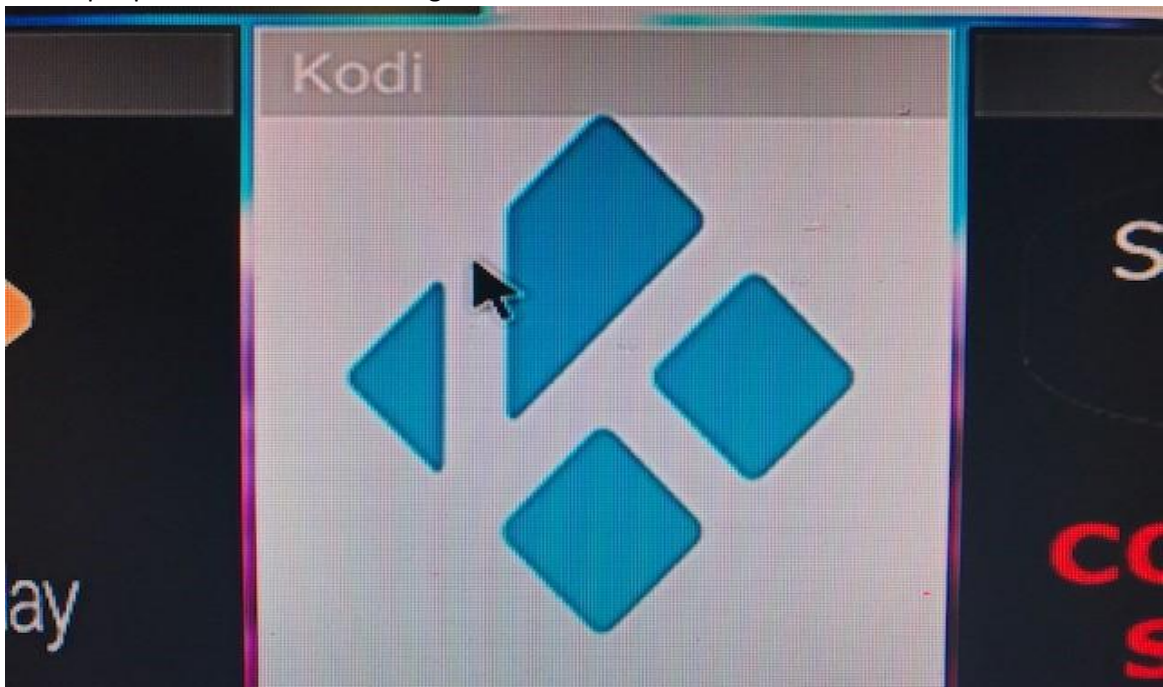

Once your apps are installed you will be able to access them from the 'My Apps' Tile

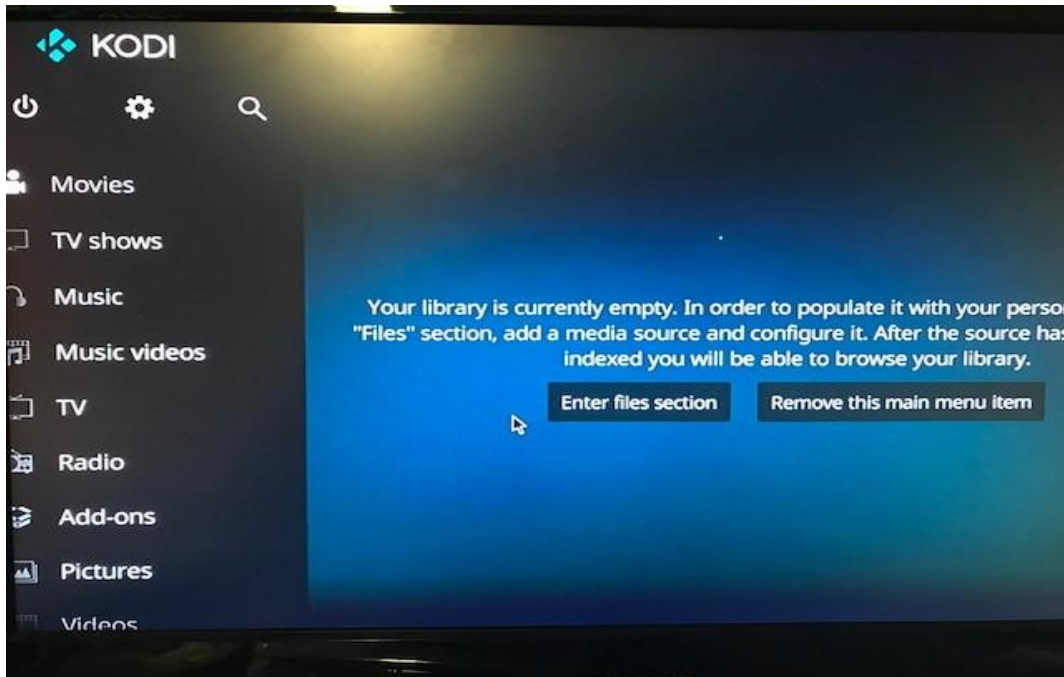

2. Click on the Google Play Store Tile and search thousands of Android Apps to download onto your TickBox. Any app that you download will be available to you under the 'My Apps' Tile

3. Kodi is a free media center application, available on many different operating systems, which allows people to consume streaming media.

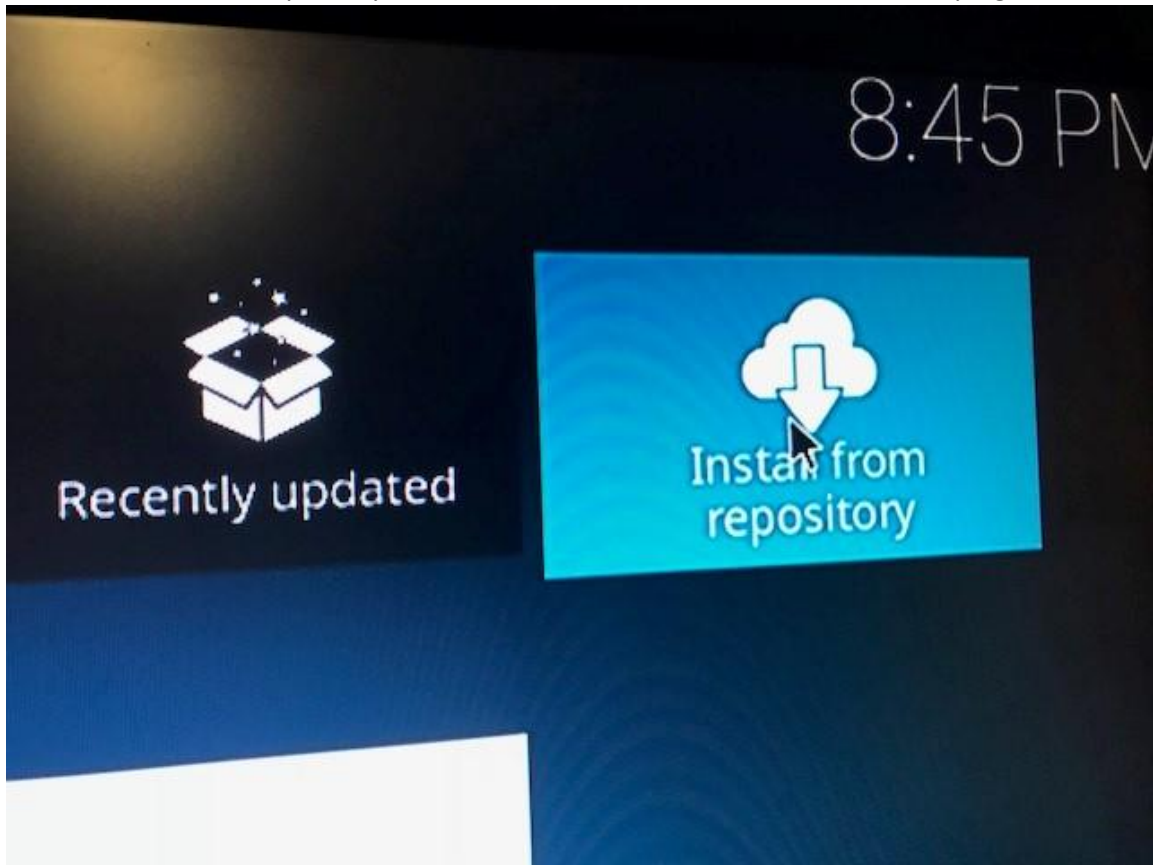

Initially you will not have any Add-ons installed within Kodi.

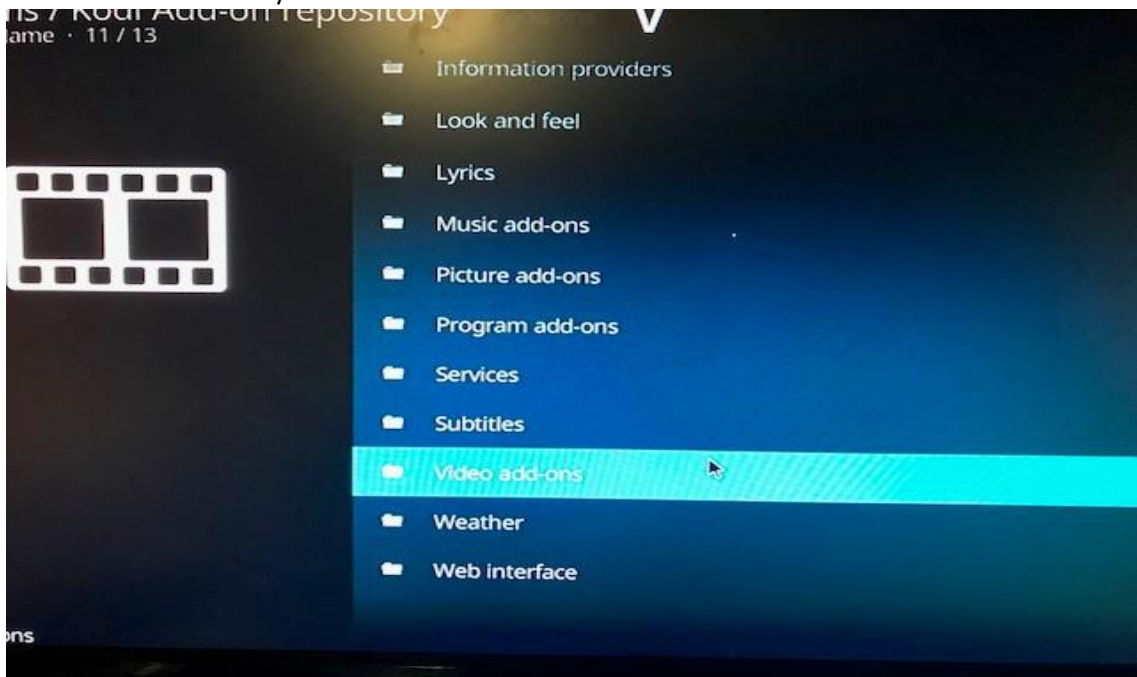

Click on 'Add-ons'

Click on 'Install from Repository' from the Add-Ons menu. It is located at the top right

You can install a variety of Kodi Add-ons like Video Add-Ons

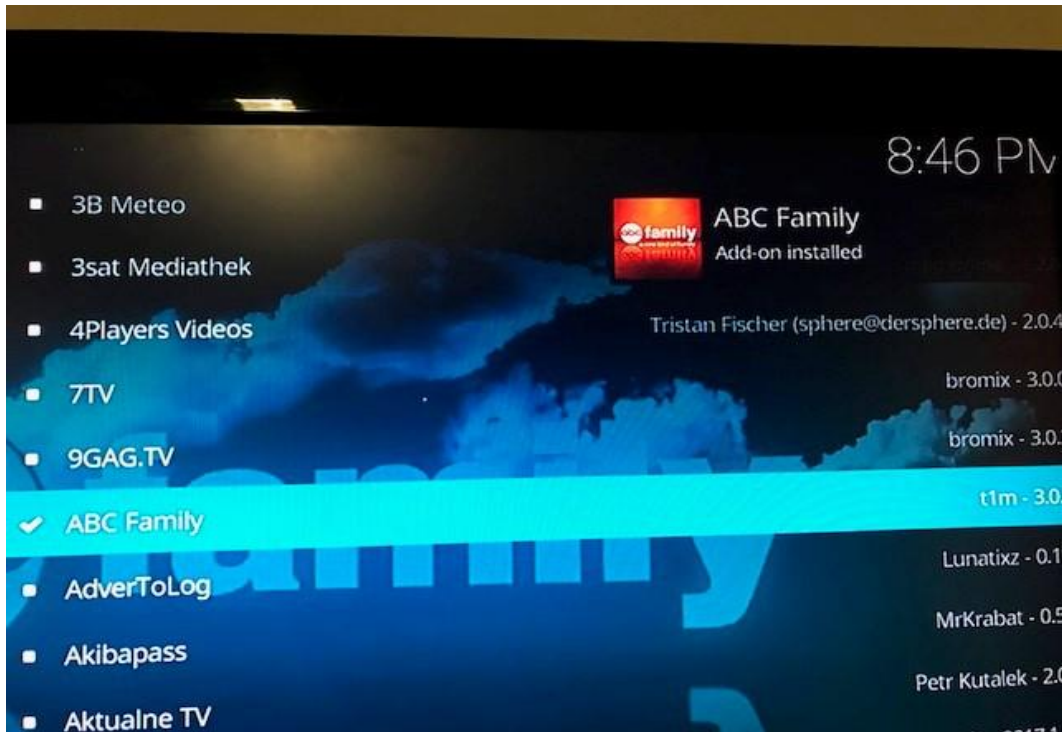

You can select from a variety of video add-ons to install like ABC Family

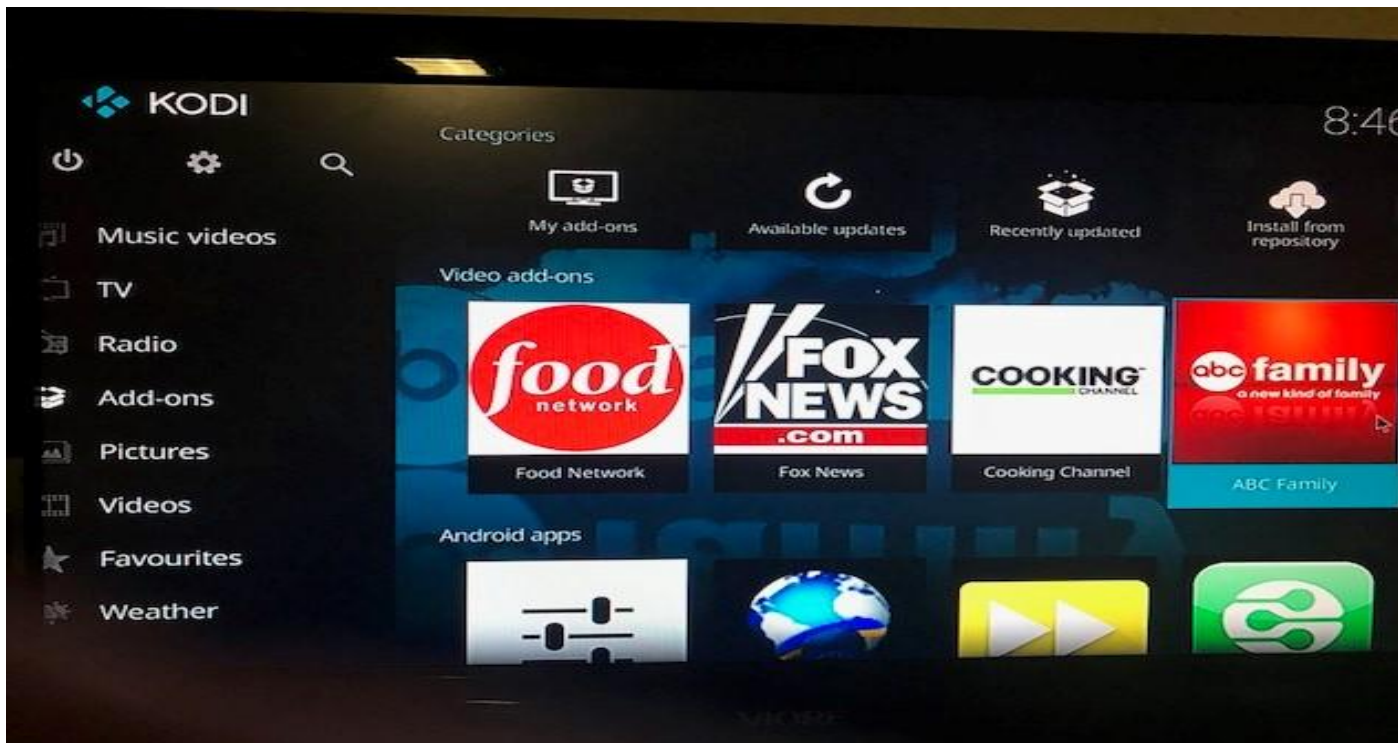

Notice that the top right of the screen lets you know the add-on was installed

To view your add-ons after they have been installed you must go back to the Kodi Home Page (you can hit the back button several times). Then go to the Add-Ons menu on the left side of the page and you will see the new Add-on on the right side of the screen.

Click on your new Kodi Add-on and start streaming

Videos / ABC Family
